CHAMBER OF COMMERCE.

In our last article upon the subject of

Chamber of Commerce, we showed that it merchants of this city owe it to themselves, of respect to the honorable profession wit which they are connected, and us due to the position of the city of Memphis, to establish a Chamber of Commerce. Strangers at a distance form a very depreciating and defects sists of the prosperity of Memphis, and of her standing as a commercial city, so long as we are without an institution rightly reckuped an bresparable adjunct to every active bush city in the United States. We also show that Memphia, being the only city in the Stat. where business operations are exclusively egaged in, is necessarily legislated for by indi- endge, filled their first appe

Some time ago a merchant wrote to us, evidently in a wrathful mood, and emanded why we did not regularly employ and pay a clerky whose sole business it should be to go to the flat busis, steamboats, railroad depots, unils and counting rooms in the city, to obtain information respecting receipts, slocks, shipments, and prices, which we should dealy publish for the benefit of himself and his brother merchants. This counterms to the head of such the sense of the principles and policy of the Remove that they send counting rooms in the city, to obtain information respecting receipts, slocks, shipments, and prices, which we should dealy publish for the benefit of himself and his brother merchants.
